

## Getting Started

By the end of this task I...

- 1) will know that PhotoPlus X5 is a 'bit-mapped' graphics program
- 2) can explain some of the ways PhotoPlus can edit photographs
- 3) can find the files I will need for the remaining worksheets

### Serif PhotoPlus

Serif PhotoPlus is a bit-mapped graphics program, used to edit graphics like digital photographs. Some examples of how PhotoPlus can be used to edit photographs are shown below.

**Unwanted objects can be removed from photos**

**Parts of photographs can be selected and the rest deleted**

**Backgrounds can be removed (or re-coloured)**

The colour of photos can be changed

Special effects can be applied to digital photographs

Page Fold

Stained Glass

Comic Book

## Finding the Files

Throughout this unit you will be using a variety of digital photographs.

Your teacher will tell you where the main folder of photos is saved.

There is a sub-folder for each worksheet in the unit.
