

PhotoFix

By the end of this task I...

- 1) can explain how the PhotoFix feature can change photos
- 2) can find a high resolution photo on the Internet
- 3) will know how to use the PhotoFix feature

The PhotoFix Feature

Another of PhotoPlus' built in features is PhotoFix. This feature allows users to create different versions of their photographs without having to understand complicated colour changing techniques. Some examples are shown below.

Original Photo

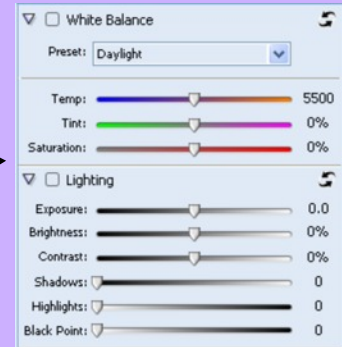

How to Use PhotoFix

To use PhotoFix simply select a photo and click on the  button.

Select a style from the left hand side.

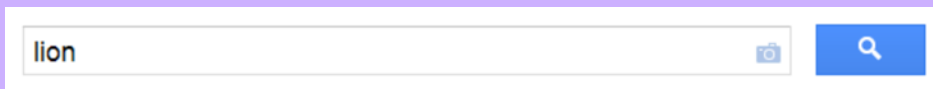

You can adjust other settings using the sliders on the right hand side.

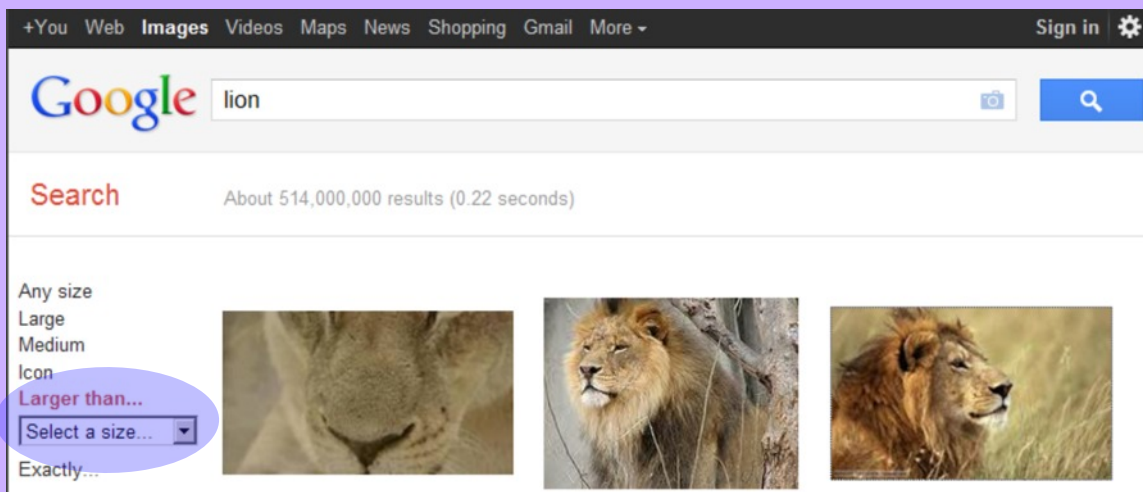

Click OK when finished.

Try - As PhotoFix is very easy to use you will not be given steps this time.

Find a photo on Internet using Google Images.

To get a photo of a suitable size, scroll down the left hand side of the search window, select "Larger than..." and choose a minimum resolution.

Search for a picture of your choice and Copy it.

Open PhotoPlus.

Click on the Edit menu, select Paste - As New Image.

Experiment using PhotoFix on your photo.
